家族同心球環境モデル研究会

The society for the study of the Concentric Sphere Family Environment Model

日進月歩の「家族看護学」に
知的興奮を感じる!

家族症候とは、法橋が新しく提唱した専門用語であり、“主観的および客観的な家族データにもとづき、看護職者が総合的に査定した家族システムユニットの困難現象”のことです。あまたの家族ケース検討や長年の臨地経験などをとおして、「家族の勢力構造の歪曲」「家族レジリエンスの発達不足」「家族インターフェイス膜の調節の不調」など、53の家族症候が明らかになっています(2014年4月現在)。家族症候を理解することで、具体的な家族支援を計画、実施することが可能になります。

家族同心球環境理論(The Concentric Sphere Family Environment Theory: CSFET)は、家族のウェルビーイングに作用する家族環境をホリスティックにとらえるために、法橋が新しく提唱した家族看護学における理論です。これにもとづいて、家族アセスメントモデル(家族症候のラベリングも含む)、家族支援モデルなどが開発されています。

本物の「家族看護」を会得し、
実践しよう!

家族同心球環境モデル研究会(CSFEM研究会)は、家族同心球環境理論/モデルにもとづいた家族アセスメントモデルおよび家族支援モデルの改良、臨地応用、実証研究、普及活動などを推進することによって、あらゆる家族への支援を具現化することを目的とします。一般会員と研究開発会員から構成され、2007年10月1日に設立されました。現在、一般会員を幅広く募集しています。

オープンなセミナーやワークショップを開催し、家族ケース検討などを行っています。これは、日本、アメリカ、中国などにおいて、随時開催します。なお、研究開発会員は、年間80回程度のクローズドな研究開発会議に参画することが前提になります。そして、競争的資金を活用した研究プロジェクトの推進、研究成果の国内外への情報発信・書籍の出版などを遂行します。

Greetings by Chairpersons of 35th IAHC

Dr. Hohashi and Dr. Turkel welcome you to the 35th International Association for Human Caring (IAHC) Conference the *Universality of Caring* in Kyoto, Japan co-sponsored by the International Association for Human Caring and Kobe University. This is the first time an IAHC Conference is being held in Japan. With global issues related to healthcare, economics, hunger, deep poverty, and conflict instead of peace, we truly believe that caring remains the essence of nursing and the core of our humanity. Our journey to planning this conference began in March 2012 when we both attended the International Conference on Caring and Peace in Hiroshima co-sponsored by the Watson Caring Science Institute and Japanese Red Cross, Hiroshima College of Nursing. Our mutual colleague, Dr. Marilyn Ray introduced us and we began the dialogue about having an IAHC Conference in Kyoto in 2014. At the 34th IAHC Conference in Orlando, Florida we set our intention to have 500 abstracts submitted and over 600 attend the conference. Thanks to the commitment and dedication of the members of the planning committee and abstract reviewers we have accepted 487 abstracts for a paper or podium presentation and most important, thanks to all of you who have traveled from over fifteen countries to join us we will have over 600 in attendance. This is the largest conference in the thirty six history of the IAHC.

The conference opens on May 24 with the SIG on Transcultural Nursing and Caring featuring a keynote address from Dr. Janice Bell Associate Professor Emeritus, University of Calgary. Dr. Bell will present *Helping Families Heal: One Nurse at a Time*. World recognized scholars, Dr. Jean Watson and Dr. Marilyn Ray will be hosting a special tribute to Dr. Madeleine Leininger on the evening of May 24 to recognize her commitment to transcultural caring and nursing. We hope to see you at the gala dinner and please introduce yourself to us so we have the opportunity of meeting all of during our time together.

The conference continues through May 27 where you will have the opportunity to hear presentations and review posters from international caring scholars reflecting the conference theme, *Universality of Caring*. Our shared vision is that we continue to inform and change nursing on a global level through caring innovations in education, practice, and research.

Kyoto is a beautiful city so enjoy shopping and site seeing. Special tours and events are planned for evenings and the day of May 28 so please inquire at the conference registration desk for additional information and to sign up for the tours.

“OMOTENASHI”

An Entertainment Project to Introduce Japan

1. Gala Dinner

May 24, 18:00-20:00, Swan

Performances of the KOTO, an elongated Japanese zither with thirteen strings, by the Eifukai of Kyoto University, and a performance of the KYOEN SODEFURE dance by the Butoukyoku Club of Kyoto Notre Dame University

Note: The word SODEFURE refers to the sleeves of a kimono, but is used figuratively to mean an opportunity to meet new people.

2. Opening Ceremony

May 25, 12:30-13:00, Main Hall

WADAIKO (Japanese drum) performance by pupils from Notre Dame Elementary School

3. Experience of Japanese Tea Ceremony in KIMONO (traditional Japanese garment)

May 24, 13:00-17:00, May 25, 10:00-12:00 and 13:00-17:00, Tea Ceremony House
SADOU (Japanese Tea Ceremony) and KIMONO KITSUKE (putting on KIMONO) by Kyoto Notre Dame University

Note: A ticket (cost: 500 yen) is required to participate in this event. You can buy a ticket at the reception, but the fee for attending the Gala Dinner also includes a ticket to participate in this tea ceremony. You won't have to kneel during the ceremony; just relax in a chair and enjoy Japanese MATCHA tea and WAGASHI (traditional Japanese confections). KIMONO is a traditional Japanese garment.

4. Experience of Making Japanese Handicrafts

1) May 24 12:00-18:00, Main Lobby

Experience making a MANEKINEKO (a common Japanese figurine which serves as a lucky charm and talisman), plus sales of HARIKO (items made with papier-mache) by Emu Atelier.

Note: A wide selection of affordable souvenirs to take home. HARIKO is a doll made using WASHI (Japanese paper craft).

2) May 24 12:00-18:00, Main Lobby

Sales of Japanese-style knickknacks and miniatures

Note: These will include Japanese knickknacks made of the same silk used to make KIMONO, by Ajisai No Ie (Hydrangea House), SASHIKO embroidery goods by the Yawata Sagyousho (Yawata Workshop), and colorful postcards by Hanamizuki (Dogwood).

3) May 25, 9:00-17:00, Main Lobby

Experience of painting and sale of KYO-TOU-NINGYOU by Tsuchida Ningyou

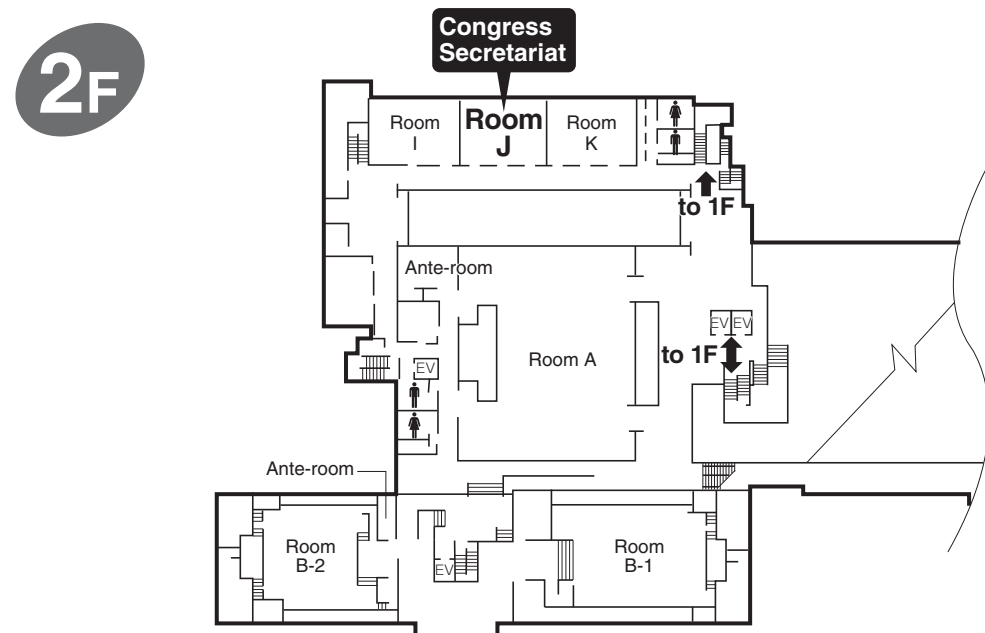

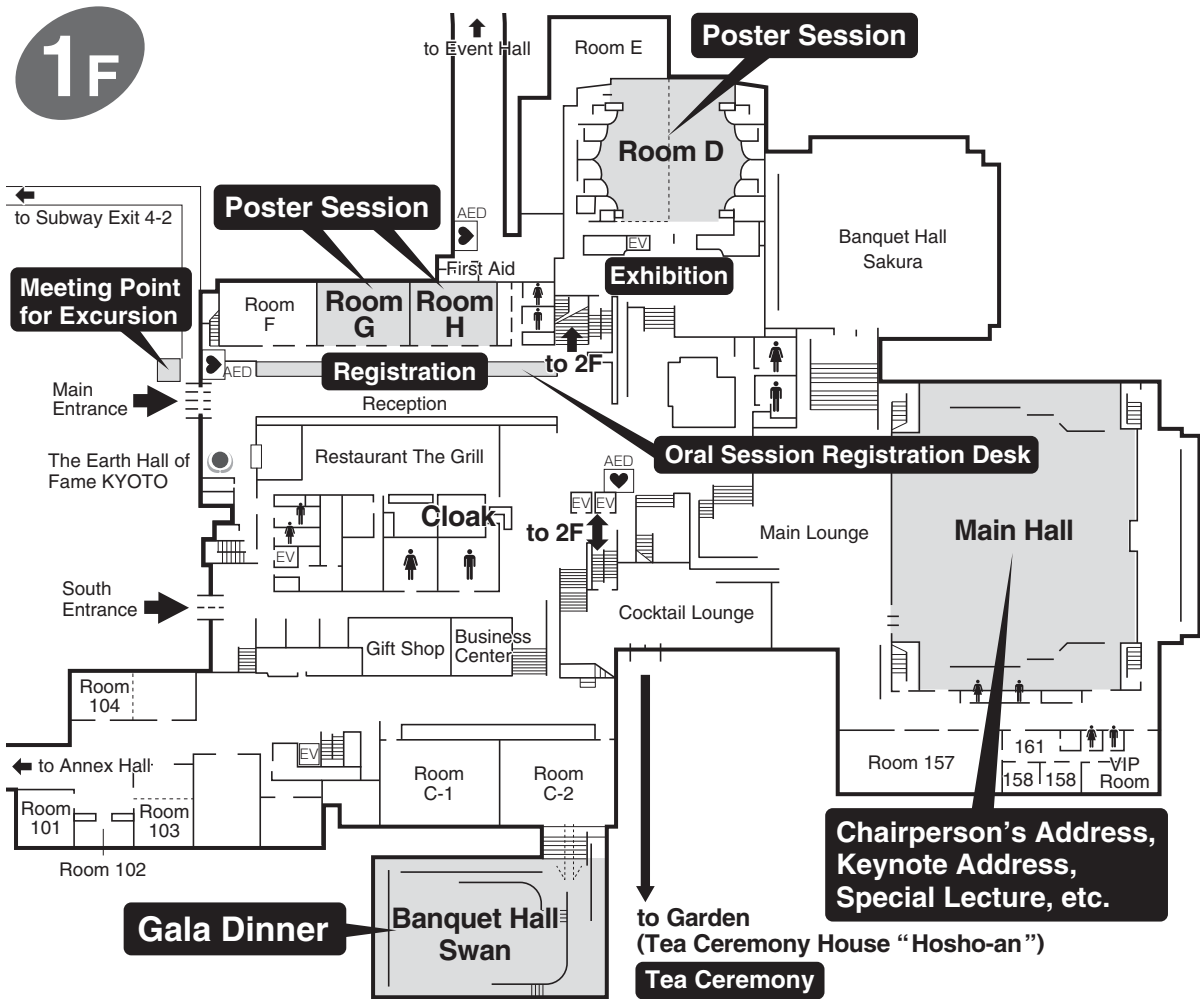

Note: You can color the ceramic dolls yourself. In addition, such items as KOKESHI (a variety of wooden doll) and scented NETSUKE (small ornamental carvings) and so on will be offered.

4) May 25, 9:00-17:00, Main Lobby

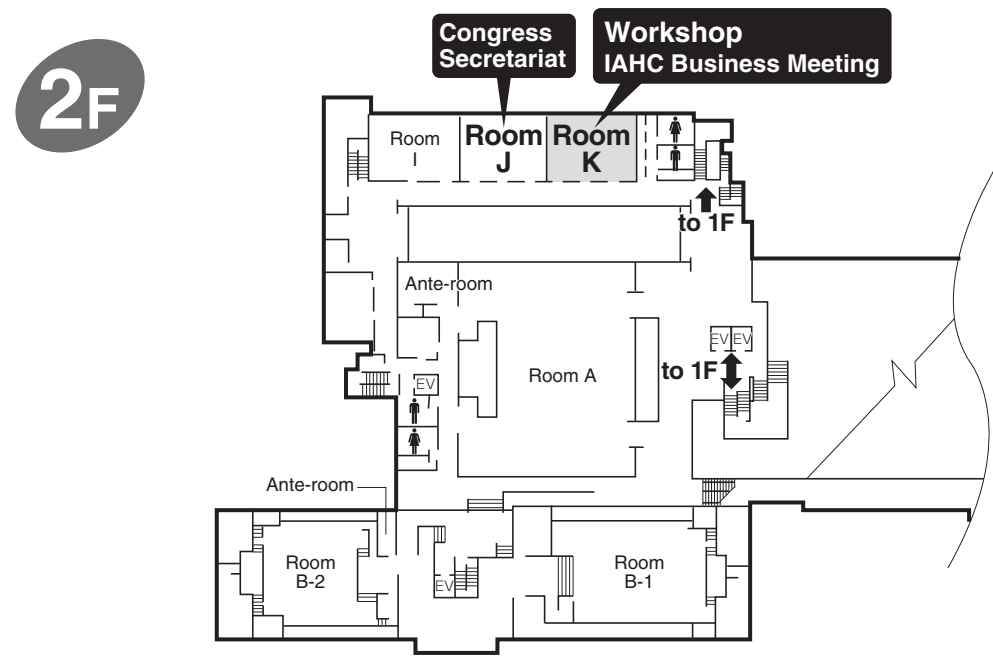

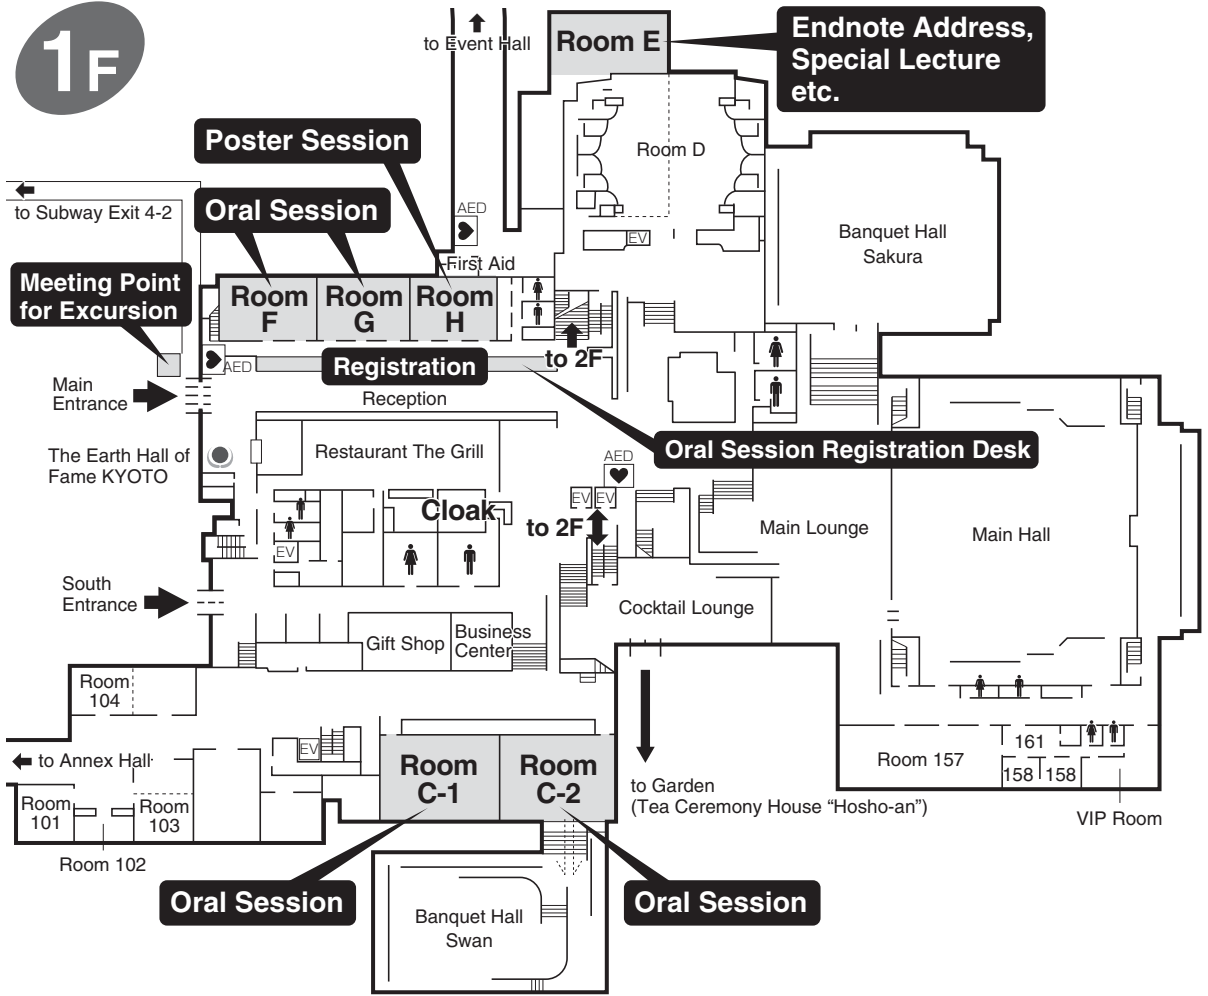

Experience and presentation of ORIGAMI (paper folding) by Elementary School Children

Note: This will be free of charge and you can keep what you make.

The Concentric Sphere Family Environment Model: CSFEM

The rapidly advancing field of family health care nursing is becoming exciting !

Professor N. Hohashi has coined a new term, "family signs/symptoms," which he uses to describe "problematic phenomena in the family system unit, comprehensively assessed by a nursing professional based on subjective and objective family data." Through reviews of numerous family cases and years of clinical experience, 53 types of family signs/symptoms have been distinctly identified (as of April 2014). These would include "distortions in the power structure of the family," "insufficiency in development of family resilience," "irregularities in regulation of the family interface membrane" and others. Through understanding of family signs/symptoms, it becomes possible to plan and implement measures for family support.

Because the Concentric Sphere Family Environment Theory (CSFET) takes a holistic approach to the environment that affects the family's well-being, Professor Hohashi is proposing it as a new theory within family health care nursing studies. Based on the family assessment model (including labeling of family signs/symptoms), the family support model and others have been developed.

Let's understand what authentic "family health care nursing" is and put it into practice !

The society for the study of the Concentric Sphere Family Environment Theory/Model, by conducting such activities as improvements, clinical applications, empirical studies, propagation activities and others of the family assessment model and family support model which are based on the Concentric Sphere Family Environment Model, has the objective of realizing support toward all kinds of families. The society, composed of regular members and research and development members, was established on October 1, 2007. Presently it seeks to expand membership through wider recruitment of regular members.

Through the conducting of open seminars and workshops, the society deals with a variety of topics, such as family case studies. These can be held at any time in Japan, the United States, China and other countries. The research and development members will need to participate in about 80 closed research and development meetings per year. In addition, the research and development members are also competitively engaged in research projects that harness competitive grants, and communicates its research findings within and outside Japan through of the issuing of information, publication of books and others.

家庭同心球环境模型研究会

在日新月异的“家庭护理学”里感受到知识的兴奋！

家庭病状是法桥最新提倡的专业术语，它是指“护理人员以主观的和客观的家庭数据为基础，综合性查定了的家庭系统单位的困难现象”。通过为数众多的家庭事例检讨和长年的实地经验，“家庭势力构造的歪曲”“家庭恢复力的发达不足”“家庭接口膜的调节不当”等的53个家庭病状得以明了（2014年4月现在）。通过理解家庭病状，就能够计划，实施具体的家庭支援。

因为家庭同心球环境理论(The Concentric Sphere Family Environment Theory: CSFET)是将作用于家庭健康的家庭环境视为一个整体来把握的，所以是法桥最新提倡的家庭看护学方面的理论。以这个理论为基础，法桥还开发了家庭评价模型(其中也包含家庭病症的分类)，家庭支援模型等。

领会真正意义上的“家庭护理”并将其运用于实践吧！

家庭同心球环境模型研究会(CSFEM研究会)通过推进以家庭同心球环境理论/模型为基础的家庭评价模型和家庭支援模型的改良，实地应用，实证研究，普及活动来实现对所有家庭的支援具体化的目的。家庭同心球环境模型研究会由一般会员和研究开发会员组成，并于2007年10月1日创立。现在正广泛募集一般会员。

家庭同心球环境模型研究会召开了对外的研讨会和讲习会，进行了家庭事例的检讨。这些活动也随时会在日本，美国，中国等国家进行。另外，家庭同心球环境模型研究会的研究开发会员则是以一年间参加80回左右的内部研究开发会议为前提的。而且，家庭同心球环境模型研究会也在进行活用竞争性资金的研究项目的推进，研究成果的国内外宣传·书籍的出版等。
